

Muhammad Sarib Hanif

+92-340-5344160 saribraja1998@gmail.com m-sarib-hanif M-SARIBHANIF

PROFESSIONAL SUMMARY

- **Full Stack Developer** specializing in scalable API architecture, database design, and automated deployment pipelines. Proven track record of building robust backend systems using **Node.js**, **PHP (Laravel)**, and **Python (Flask/FastAPI)** alongside responsive **React.js** frontends. Adept at leveraging **Docker** and **CI/CD methodologies** to streamline DevOps workflows and ensure high-availability cloud deployments.

CORE COMPETENCIES

- **Backend Engineering:** Node.js, PHP (Laravel), Python (Flask, FastAPI), RESTful API Design, Microservices Architecture.
- **Frontend Development:** JavaScript (ES6+), React.js, Responsive UI/UX, State Management, HTML5/CSS3.
- **Databases:** Relational (PostgreSQL, SQL, SQLite) & NoSQL (MongoDB, Firebase, Supabase), Schema Optimization.
- **DevOps & Deployment:** Docker, Docker Compose, CI/CD Pipelines, Git/GitHub, GitHub Actions, Automated Testing.

EXPERIENCE

Full Stack Software Developer

CYMAX TECH

Oct 2024 – Present

Islamabad, Pakistan

- Engineered comprehensive **Accounting Management Applications**, building robust backend systems to handle core financial workflows and ledgers.
- Architected modular **RESTful APIs** in **Node.js** to resolve complex accounting logic, improving data processing efficiency and reporting accuracy by **75%**.
- Developed modern, responsive frontend dashboards utilizing **React.js** for financial tracking, significantly enhancing user experience and team productivity by **60%**.
- Spearheaded DevOps initiatives by configuring local and staging environments utilizing **Docker** and **Docker Compose**, streamlining the **CI/CD deployment pipeline**.
- Conducted rigorous automated API and unit testing across Python and Node.js microservices to guarantee accounting system stability.

Software Developer Intern

Horizon Tech Services

Aug 2024 – Sep 2024

Islamabad, Pakistan

- Developed a Full-Stack Laboratory Information Management System (**LIMS**), digitizing lab operations utilizing modern **PHP frameworks(Laravel)**.
- Architected scalable backend data structures using **PostgreSQL** and **MongoDB**, ensuring robust data integrity for high-volume scientific records.

IT Support Intern

LCC Pakistan

Jun 2023 – Sep 2023

Islamabad, Pakistan

- Provided technical support for enterprise applications; documented system bugs and assisted in workflow process optimization.

PROJECTS

Agile Project Management Dashboard — React & FastAPI

Jan 2026 – Present

- Developed a comprehensive project management tool inspired by **Azure DevOps**, featuring full-stack sprint and task tracking.
- Built analytical dashboards with a **React.js** frontend, consuming secure RESTful APIs built across **FastAPI and Node.js microservices**.
- Automated testing and deployment workflows utilizing **GitHub Actions** and containerized the application with **Docker**.

Relief Insight Pakistan — AI & Data Analytics Platform

Apr 2023 – Jun 2024

- Built a web tool to classify poverty zones from satellite imagery using CNNs. Placed in the Top 10 at NICAT for startup incubation.
- Deployed end-to-end utilizing a **React.js** frontend and a **Flask** backend, integrated with **Supabase** for real-time data syncing.
- Designed the analytics database using **PostgreSQL**, optimizing complex **SQL** queries for high-volume geospatial data retrieval.

Full-Scale E-Commerce Platform — MERN Stack

Aug 2021 – Oct 2021

- Designed and deployed an Amazon-inspired e-commerce platform utilizing the **MERN stack** (MongoDB, Express.js, React.js, Node.js).
- Engineered a secure backend architecture featuring JWT authentication, payment integrations, and a **Firebase** admin control panel.
- Built a responsive **React.js** frontend with dynamic product filtering, cart state management, and seamless checkout flows.

EDUCATION

Air University

B.Sc. Computer Science

Sep 2020 – Jul 2024

Islamabad, Pakistan

- **Relevant Coursework:** Software Architecture, Database Systems, Web Engineering, Data Structures.

CERTIFICATIONS

- **Lead 360 Certification** | **100 Days of Code in Python** (Udemy) | **.NET Core MVC Guide** (Udemy)
